

Certificate

07C10204

This document is proof that

Avalon Foundation has offset **111,75** tons CO₂,
caused by

Avalon Meetings & Conferences

from 25 September until 3 October 2009.

Offsetting is realised with CO₂ reduction projects of
Climate Neutral Group. By reducing CO₂ in our atmosphere, these
projects help counter global warming.

As an indication: to offset these emissions, on average a
windturbine has to be operational for 279 hours,
or 5588 trees have to grow for one year.

René Toet

Managing Director Climate Neutral Group
Utrecht, 15/12/2009
